Cleaning Station for Seals

OPTIONS

## SealCleaner 20

### Description

The SealCleaner 20 is an accessory used in loose piece sealing. It easily cleans and dries oily seals by tumbling them in combination with special towels. Cleaning the seals prevents them from sticking together and reduces feedtrack contamination, thus ensuring higher process reliability. The SealCleaner 20 is an easy to use independent accessory for use with automated as well as with benchtop seal processing machines. Schleuniger recommends cleaning oily seals with the SealCleaner 20 before filling them into the processing machine.

### Special Features

- Countdown timer for setting the cleaning time with automatic shut-off
- Automatic input voltage regulator
- Removable seal container, easy to fill and empty
- Operating buttons for Power ON/OFF, Start and Stop
- Air input for best cleaning results
- Special cleaning towels

### Technical Specifications
